STRATEGIC REPORT FOR THE YEAR ENDED 31 JANUARY 2014

Principal Activity and Status

The Company is a wholly owned subsidiary of Downing Planned Exit VCT 6 plc. The principal activity of the Company is that of an investment manager and providing administrative support to its parent company.

Business review and future developments

The Company traded satisfactorily during the year, achieving turnover of £75,974 (2013: £110,857), which was wholly derived from its parent company.

The Company acts as an investment manager to its parent company and is paid 1.35% of the parent company's net assets per annum. Additionally, the Company provides administration services to the Downing Planned Exit VCT 6 plc for a fee of £40,000 (plus RPI) per annum. The agreement is for a minimum term of three years with a twelve month notice period on either side at any time after two years following the commencement of the agreement.

Key Performance indicators

The Company's performance is directly linked to the performance of the parent company. The directors believe that the Company's key performance indicator is Net Asset Value Total Return (NAV plus cumulative dividends paid to date) of the parent company.

Financial risk management

The Company's operations expose it to a variety of financial risks which can be analysed as follows:

Credit risk

The Company's principal financial assets are cash at bank and trade debtors which represent the Company's maximum exposure to credit risk in relation to financial assets.

The credit risk on funds held at the bank is limited as the bank has a high credit rating assigned by international credit-rating agencies.

The credit risk on trade debtors is also negligible as the majority of transactions are undertaken with the parent company.

Liquidity risk

The Company has negligible liquidity risk as it derives its income from its parent company.

Cash flow interest rate risk

Interest bearing assets comprise cash at bank which earn interest at Bank of England base rate. As the Company has no borrowings, changes to base rate have only a negligible effect on the Company.

Price risk

The Company has no exposure to securities price risk as it holds no investments.
